## THE NATIONAL CAPITAL Events of Interest From Wash- ington.

By J. E. Jones.

### WHO IS GOING TO PAY?

The profits of the United States Steel Corporation for 1917 will be \$400,000,000; and most of this will be made out of war supplies. Is it any wonder that people in Wall Street are asking: "Do you think there is any danger of the war being stopped?" There have been various propositions before the Senate to tax excess profits, and under analysis all these propositions have been juggled in the interests of Steel. Every effort to shift a substantial part of the war burden onto the capitalistic interests has met with defeat. Something like \$4,000,000 additional is to be loaned to the Allies; and before many moons will be costing the people of the United States one million dollars an hour. In the face of these frightful conditions Congress has stood by the rich all the way through. The common people are the ones who will have to pay the tax.

**LIBERTY LOAN ADVERTISING.** Groups of advertising interests have been buckling into Washington, attempting to secure appropriations for advertising the next Liberty Loan. They want about a million and a half dollars, out of which they propose that the small papers of the country shall receive \$100,000, and the rest of the pot will be split between the Curtis publications, and a few other large groups. Of course the influential daily newspapers are to be taken care of—otherwise they might "spill the beans." At the United States Treasury the question of newspaper advertising is receiving serious consideration, and the policy of giving the 10,000 small papers of the country some of the crumbs, is being looked on with favor. Mr. McAdoo is reported as having said that he believed "every paper should be treated exactly alike." Of course there may be no advertising at all. None was done for the first Liberty Loan; but more difficulty is expected with the next issue of bonds.

**HOOVER IS SUCCEEDING.** One after another of the great industrial agencies are coming to the front, agreeing with Food Administrator Hoover upon prices to be charged for food supplies. "The Hoover Administration is getting what it wants," declared one of the representatives of the largest institutions in the country. That tells the story rather completely. Mr. Hoover makes a business of finding out what prices are somewhere in reason, and then he gets the men who will handle the different committees to agree to sell at a stipulated figure. That they are all doing it, because they know that if they do not, the Government will proceed to set arbitrary prices, as was done in the case of the coal miners.

**MEXICO IS IN GOOD GRACES.** For a long time Mexico was under suspicion, but recent developments indicate that the Carranza Government has grown rapidly in favor of late; and the probabilities are that the republic to the southwest will eventually land a loan. All fear that German propaganda is being manipulated from Mexico has been removed.

### WASHINGTON AND THE PACIFIC FISTS.

While the People's Council was having its difficulties trying to meet in Minneapolis, Hudson and Chicago, the fist gained ground that the pacifists would come to Washington to hold their sessions, and it was made plain through the public press that the police would permit the meeting, and give protection. The idea that free speech is to be suppressed is apparent to all as popular in the Capital as in the interior of the country. In Washington pacifists are not regarded as persons attempting to interfere with the Government's policy. "They are held upon merely as people who believe that the war could be brought to an end very early date, instead of fighting to the last ditch." It is true that pacifism is not flourishing in Washington but to the credit of the city, it may be said that discussions of every phase of public questions, whether of the war or not, are not hidden.

**VIC MURDOCK COMES BACK.** A few years ago a young newspaper came to Congress from the State of Kansas. This young Mardon

## GRANGE NEWS

**CANTON GRANGE.** Canton Grange observed Young People's Night, Saturday evening, with a good attendance. The chairs were filled by the young people, Arthur Tucker acting as Worthy Master. At the close of the meeting the following program was enjoyed:

Plane solo, Miss Ada Bonney Reading, Mrs. W. A. Lucas Music, Arthur Westgate, violin, and Miss Eleanor Westgate, piano Reading, Mrs. H. M. Tucker Remarks, Herbert M. Tucker Refreshments of ice cream and cake were served and dancing was enjoyed, music being furnished by Arthur and Eleanor Westgate.

### UNION GRANGE.

Union Grange, East Sumner, met Saturday evening, Sept. 7, in regular session with a fair attendance. The minutes of the last meeting were read and the resolutions of respect on the death of Helen Chandler were presented by the following committee: Nellie Bisbee, Lucy Russell, Nellie Kicker, and read by the secretary, Ida Bonney. The proposed of sick members read Ruth Crockett and Win Allen Improving. Patriotic songs were sung and the meeting closed in usual form. The next meeting will be in two weeks, an afternoon session.

### PLEASANT VALLEY GRANGE.

Pleasant Valley Grange, No. 126, West Bethel, held its regular meeting Tuesday evening, Sept. 11, with 25 members and two visitors present. Officers pro tem. Overseer, Chaplain, Secretary, Assistant Steward, Lady Assistant Steward, Gate Keeper, Clerk, Flora. The third and fourth degrees were conferred on two candidates. It was voted to begin the meeting at eight o'clock sharp. A special meeting will be held Friday evening to make plans for the coming Grange fair to be held Sept. 25. The literary program consisting of the Grange Paper read by Mabel Carpenter.

### NORWAY GRANGE.

Norway Grange met Sept. 8 in regular session. Meeting called to order by Worthy Overseer, Fred Lovejoy, at 2 p.m. Meeting opened in form and minutes of last meeting read. The Grange joined in singing "America," after which several matters of business were taken up and disposed of. Sister Lelia Watson resigned from the committee on the Grange fair to be held later, as she would not be able to attend to the duties that would devolve upon her. A member will be appointed at the next meeting. Resolutions of respect were read by Sister Isaac Cox on the death of Sister Jessie Town Delano.

An abbreviated literary program followed but it was interesting. The topic, "Trips about the country and what I have gained by exposures and observation," was made very entertaining and instructive by Sisters Jessie Cox, Zilpha Prince, Lelia Watson, Leonie Tubbs, Lucelia Merriman, Mary Oxford and others. Report of stand and feature committee present, corn and grain, Fred Lovejoy and Frank Gammon. This was followed by current events and quotations.

Lecturer read program for next meeting, and announced that the first meeting in October, the 13th, will be devoted to our Goddesses, Pionies, Flora, and Flora. The meeting of Oct. 21, Members Day; Meeting of Nov. 19, Young People's Day.

The program for the meeting of Sept. 22 follows:

Opening Song, "As We Go Forth To Labor," Page 22. G. M.

Music, "Beautiful Grange That I Love," Grange Chorus.

Topic, "The Grange as a training school for leadership," told by Edith Knightly, followed by general discussion.

Song, selected. Topic, "Pictures for the Home," Dissemination by Alice Foss, followed by Annie Brown, Abby Thurston and others.

A study of our local industries, on informal talk by J. A. Wentworth, followed by general discussion.

Music, Novel Brown.

Song, selected by Charlotte Moore.

A. M. Bonham special feature, Mail Distribution, C. W. Perry, Mrs. F. W. Perry, Mrs. Perry.

What I have missed and what I have gained in Grange progress during the summer. General response.

Subscriptions now for THE OXFORD COUNTY CITIZEN.

## CHURCH ACTIVITIES

### UNIVERSALIST CHURCH.

Morning service and sermon at 10:45. Sunday school at 12.

Evening service at 7. Topic for next Sunday, "Enjoying the World, God has given us; the joy of Living."

### CONGREGATIONAL CHURCH.

Morning worship Sunday at 10:45.

Sunday school at 12.

### THE LADIES' CLUB.

will meet with Mrs. William Rogers Chapman, Thurs-

day afternoon at three o'clock. Mrs.

Chapman extends a cordial invitation

to all ladies of the parish and it is

hoped that a large number will be

present.

Mid-week service Tuesday evening at 7:30.

### SEND THE CHILDREN TO SCHOOL.

State Superintendent Urges a Regular

Attendance.

As a measure of present defence

and for the future welfare of the

country, as well as for the individual

benefit of the children themselves, it

is of the greatest importance that our

schools be maintained in the highest

standard of efficiency while our

country is at war. To this end we are

calling upon superintendents, school

committees, superintendents, teachers and

parents to join us in a campaign to

conserve the usual standard of the

schools of the State of Maine.

During 1916 our school enrollment

included 152,470 pupils and it is our

duty to sustain this record even in the

present situation. If the attendance

is reduced, the future strength of state

and nation will be correspondingly im-

paired. During the early part of the

term school officials should compare

the attendance register with that of

last year and with the census report,

and if a falling off is revealed a speci-

al effort should be made to secure the

usual number or even to increase it.

Parents should not take advantage of

the present situation and make it an

excuse to keep their children out of school, but should cooperate

sympathetically with school authorities

and their attempt to maintain the

standard of the schools. It is important

that children give prompt and

regular attendance to school duties.

The normal schools and colleges

should not be overlooked. I would urge

all of the young people of the state,

who can possibly do so, to find a way

to continue their college courses.

Should the war continue for some time

as it may and the fall strength of our

resources be called into service, an

education will prove a most valuable

asset to those who are unfortunate in

war. Not only as a selfish consider-

ation, but as a patriotic duty, our

**HABITS.**

Flora Williams Wood.

Habits cling to us like a growth of fungi to an oak. We grow to what we anticipate. If we anticipate that we will be unhappy, and old before our time, that prophecy is very apt to be fulfilled, simply because thinking it so, helps to make it inevitable. All optimism is a gift of Psychology, that hope and inspiration are found in the Bible. Some of us get in the habit of reading the Bible, others get the habit of snoring, distrust, disbelieving, until life becomes a burden to them instead of a pleasure. We get the habit of certain dress, certain hours of doing certain things. We often become so habitual in our make-up, as to be in all around pest, that is, if our habits are not good ones, for, if they are bad, the world is seldom tolerant. People with good habits always find a welcome place. We should take heed of our habits for the very reason they are of slow growth and seldom noticeable, until we become a victim to our faults, either good or bad. We get in the habit of lying in bed in the morning or rising early, retiring early or late. We also get in the habit of strong drinks and other dissipation, and it is much easier to slip in the bad than to try to get rid of them when they have become almost second nature to us. We get the habit of becoming a slave, of being selfish, of contradicting, and misrepresenting, and a thousand other little things I might mention, until we find our personality altogether changed, perhaps far from what the Creator intended us to be. We should then be very careful of our habits, since they mould our character for either good or bad.

Worst of all, we are apt to be careless in the habit of our dress, forgetting that it always pays to be well groomed, although there may not be another person within a radius of forty miles to see us. We feel better if we are clean. To be well groomed does not always mean fashionable attire, but cleanliness for the most part. There is no excuse for a person being unhygienic unless a helpless invalid, and the habit of being just a little particular—not painfully so—demands respect every time. If we are clean in our habits morally and physically, we appear at a better advantage everywhere, and neatness is always a recommendation for us, and speaks plainer than words. Many good positions are obtained by this badge of self respect. Habits are essential and non-essential. Let us not mistake the two kinds. Essential

when they exceed to our daily growth, non-essential, when they impede our destiny. The dictionary defines "Habits" as "a fixed or established custom," then we should be careful how we establish ourselves. We do not care to be fixed along certain purposes from which there is no bending. Fixed ideas are often very good, but too often fixed ideas give us the poise of statuary, yet, often susceptibility is a characteristic habit. How careful should we be not to become inveterate from the consequence of habit, so much as to dwell within an empty hive. Any custom without rule or order, is not the best company. What a careful study we should then make of ourselves, that from any force of habit we keep one other than what we are. A good estimation of those things which are best for us, the ways of living, feeling and acting, and the consequence of any customary habit which tends to make or mar the natural tendency toward the best in us, and to be ever watchful of those practices which make us either willing or unwilling habits in our soul's abode, is worth some thought at least.

**CHOICE PICKLES.**

The following are chosen recipes selected from those used by practical homemakers. They have been tested many times and proved entirely satisfactory.

Always use firm, fresh fruit or vegetables, and when they are abundant and in a perfect state of development. Purchase the best apple vinegar; good pickles depend on good vinegar. Procure new rubber rings for the jars and use porcelain or enamel kettles.

Piccalilli.—Chop fine one peck of green tomatoes and eight large onions, stir in one small cup of salt. Let stand over night, and in the morning drain off all the liquor. Pour over the vegetables three quarts of water, let come to a boil and drain through a colander. Place it back in the kettle, pour over it two quarts of vinegar, one pound of sugar, half a pound of white mustard seed, one teaspoonful of poppy, two of cinnamon, one of cloves, two of ginger, one of allspice and a fourth of a teaspoonful of cayenne pepper; boil ten minutes and seal in glass jars.

Cucumber Pickles.—For one gallon of small cucumbers make a brine that will bear up an egg; heat it boiling hot and pour it over the cucumbers; let them stand twenty-four hours, then wipe dry; heat some vinegar boiling hot, pour over them and let stand twenty-four hours. Pour off this vinegar and add to fresh vinegar, one cup of brown sugar, a teaspoonful of mustard seed, the same amount of whole cloves and broken cinnamon bark, a very small piece of alum and a tablespoonful of celery seed; heat to the boiling point, pour over the cucumbers and seal tight.

Green Tomato Pickles.—Wash and slice without peeling one peck of small, sound, green tomatoes, place them in jars in layers with a slight sprinkling

of salt between. Let stand over night; in the morning drain off all the liquor. Add to three pints of good apple vinegar one cup of sugar, tablespoonful of broken cinnamon bark, tablespoonful of cloves and of mustard. Boil vinegar and spices five minutes and pour on hot. Seal tight. A small piece of alum and horse-radish root will improve pickles.

Pickled Beets.—Cook twelve small beets until done. To two cups of vinegar add half cup of sugar, one-half teaspoonful of celery seed, the same amount of broken cinnamon bark and whole cloves, a little salt. Peel the beets and place them in the fruit jar while hot, boil the vinegar with the spices and pour over the beets. Seal tight.

Green Pepper Mangos.—Select firm, sound, green or red peppers; with a sharp knife remove the top, take out the seed, soak over night in salt water, then fill with chopped cabbage and green tomatoes, seasoned with salt, mustard seed, cloves and cinnamon. Sew on the tops. Add a cup of sugar to each gallon of vinegar used, boil and pour over the mangos. Pour off the vinegar and boil for three mornings, then seal. Small green muskmelons can be pickled in the same manner.

**SUGAR PRODUCTION, IMPORTS AND EXPORTS.**

Big Increase in Imports from Virgin Islands.

The receipts of sugar into the United States amounted to \$7,472,723,906 pounds valued at \$347,574,023 in the fiscal year ended June 30, 1917, against \$7,620,053,063 pounds valued at \$205,956,104 in 1916, the high record year, and \$822,825,102 pounds valued at \$155,077,128 in 1914. While the quantity received in 1917 shows an increase of 2,926 over 1914, the value increased 124.5%, the Bureau of Foreign and Domestic Commerce, Department of Commerce, announces.

Of the total arrivals of sugar in 1917, 5,352,745,854 pounds valued at \$230,045,694 came from foreign countries, 1,182,605,056 pounds valued at \$62,741,164 from Hawaii and 977,377,966 pounds valued at \$35,987,767 from Porto Rico. Of the 5 1/3 billion pounds imported in 1917 from foreign countries 4,069,007,398 pounds came from Cuba, 114,307,301 pounds from the Dominican Republic, 153,104,100 pounds from South American countries, 267,391,954 pounds from the Philippines Islands, 26,406,776 pounds from our recently purchased territory of the Virgin Islands, formerly Danish West Indies, 21,882,000 pounds from Japan, and lesser amounts from other countries.

The imports from the Virgin Islands and Japan show remarkable increases when compared with previous years. There were no imports of sugar from the Virgin Islands in 1916, and the total imports from these islands in the five fiscal years 1912-1916 amounted to 25,012,546 pounds, 1/2 million pounds less than the quantity for 1917. In 1916 the imports of sugar from Japan were 5,110 pounds, and only 26,410 pounds for the five years 1912-1916, against 21,882,000 pounds in 1917. The imports of sugar from the Dutch East Indies, which amounted to 310 1/3 million pounds in 1912, fell to 21,813 pounds in 1917. The imports of best sugar for 1917 were only 25,547 pounds.

The production of sugar in the United States for the fiscal year ended June 30, 1917, is estimated at 2,207,251,840 pounds, of which 821,769,300 pounds were cane and 1,385,452,450 pounds best sugar. This production with the imports from foreign countries and receipts from insular territories would make the sugar available in the markets of the United States amount to 9,739,840,746 pounds. Of this amount 1,216,810,336 pounds valued at \$77,066,692 were exported as domestic refined sugar, 5,711,344 pounds valued at \$234,375 were exports of sugar in the condition in which imported, and the shipments to insular territories amounted to 18,229,532 pounds, valued at \$1,329,741. Deducting these shipments from the receipts and production would show 8,468,669,533 pounds as retained in the United States, an average of 81 pounds per capita, against 7,999,123,762 pounds, an average of 78 pounds per capita in 1916, and 8,783,741,238 pounds, an average of 80 pounds per capita in 1917.

The average price of imperial sugar in 1916 was 2.61 cents per pound; in 1915, 3.2 cents per pound; and in 1917, 4.8 cents per pound, an increase of 11.9% in three years. The average price of sugar from Hawaii was 3 cents in 1914 and 5.5 cents in 1917; from Porto Rico the average price was 3.1 cents in 1914 and 5.5 cents in 1917. Refined sugar exported averaged 2.6 cents per pound in 1915 against 5.2 cents in 1917.

Each cloud has of silver a lining. Though we may not see its light. The sun has not ceased in the shining. Though hidden awhile from our sight.

Mrs. Lindsey Now Keeps House For Seven.

Tennille, Ga.—"I want to tell you how much I have been benefited by Lydia E. Pinkham's Vegetable Compound. About eight years ago I got in such a low state of health I was unable to keep house for three in the family. I had dull, tired, dizzy feelings, cold feet and hands nearly all the time and could scarcely sleep at all. The doctor said I had a severe case of ulceration and without an operation I would always be an invalid, but I told him I wanted to wait awhile. Our druggist advised my husband to get Lydia E. Pinkham's Vegetable Compound and it has entirely cured me. Now I keep house for seven and work in the garden some, too. I am so thankful I got this medicine. I feel as though it saved my life and have recommended it to others and they have been benefited."—Mrs. W. E. Lindsey, R. R. 1, Tennille, Ga.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

**CANTON**

Harold Walker and daughter, Alice, of Woolwich have been guests of his grandmother, Mrs. Mary French, and daughter.

Mrs. Martha A. Hathaway and daughter, Mrs. Charles Williams, and little son left Thursday for their home in Washington, D. C.

Mr. and Mrs. Emory Parsons of Hartford are visiting their daughter, Mrs. Fred Gates, of Haverhill, Mass.

Mrs. Dora T. Chase of Portland is a guest of her parents, Mr. and Mrs. W. Thompson and daughter of Pleasant Street.

Miss Mabel J. Goding has gone to Bartlett, N. H., to teach school.

The corn factory started up operations last Saturday.

Mrs. Wm. O. Hayden and brother, Donald Adams, have been guests the past week of their uncle, Charles W. Adams, of East Wilton.

Miss Nina Russell of Portland is at the home of her parents, Mr. and Mrs. A. E. Russell.

The Misses Clara and Annie Barnes and Miss Elizabeth Holmes of Plymouth, Mass., are guests for two weeks at the home of Chas. E. Richardson.

The schools in Canton will open Sept. 17th.

A meeting of doctors was held at the residence of Dr. E. W. Morse, Thursday, Sept. 6th, to raise the medical fee table. Drs. J. S. Sturtevant and J. M. Sturtevant of Dixfield, F. W. Morse and R. W. Bicknell of Canton, H. H. Atwood and H. E. Douglass of Buckfield were present. It was decided to make the fee for a day visit in the village from 7 a. m. to 7 p. m., \$1.50, and the fee for a night visit after 7 p. m., \$2.50. Other fees were somewhat increased. The new table goes into effect Oct. 1, 1917.

At the annual meeting of Whitney Lodge, F. & A. M., held Thursday evening the following officers were elected: M. Geo. Rose; S. W. Almon Poland; J. W. Herman Childs; Sec. A. F. Russell, Jr.; Treas. Frank M. Oliver; S. D. Arthur Turrell; J. D. James Davis; Finance Committee, Herman Childs, Davis Yates, Caleb E. Mendenall.

Mr. and Mrs. C. F. Oldham have been on a visit to South Paris, guests of Mr. and Mrs. Wm. B. Russell. The four enjoyed an auto trip to the White Mountains.

Mary I. Richardson commenced teaching school at North Turner this week.

Mr. and Mrs. J. W. Bicknell have been guests of relatives at Lewiston.

Miss Cora Benson of Brockton, Mass., has been a guest of Mrs. E. E. Cook, of York and is now visiting her cousin, Horace Bartlett, of Hartford.

Alvin S. Morse, who has kept a grocery store in Canton for the past year, is closing out his business, and will go this week to Dover, N. H., to teach school. His family will remain here for the present.

Mrs. Robert Huse of New Jersey gave a very able and convincing address at the Opera House, Saturday evening on equal suffrage. Mrs. Huse is a distinguished, intellectual woman and a charming speaker, and those who had the good fortune to hear her Saturday evening received much good. Mrs. Huse was introduced by H. E. Patterson.

A crew of men are at work on the new foot bridge in Canton village and work on the new concrete bridge will soon commence.

The Pine Tree Club will hold its first meeting for the season next Saturday evening received much good. Mrs. Huse was introduced by H. E. Patterson.

A party from this town attended the presentation of "The Old Peabody Pew" at East Somers last week and report an excellent time.

Evergreen Chapter will resume its meetings this week after the summer vacation.

Arthur G. Hayes of Richmond was a Sunday guest of his parents, Mr. and Mrs. Erastus Hayes.

The Relief Corps is planning to raise \$25 for purchasing knitting yarn for the sailors. A supper will soon be held to help raise the amount.

Evangelistic services will be held each night this week at the United Baptist church under the direction of Mr. Gerald Baney.

Mrs. M. A. Smith went on a picnic with a gathering of relatives at Screw Auger Falls, Sunday. Her sister, Miss Edith Abbott, remained with her for a visit.

Mr. and Mrs. Stevens of Portland are enjoying a vacation at the cottage of H. T. Turrell by the lake.

Mrs. Marion Smith, Donald Baney, Mrs. M. J. Childs and Mrs. Cora Fullerton attended Chautauqua at Hamden last week.

Lillian Ellis has been assisting in the care of her grandmother, Mrs. H. E. Cook, of Farmington.

Mr. and Mrs. John Tawle have moved from Sydney to Canton.

Mr. and Mrs. Charles Reed

of Pleasant Street

are spending a week at the home of H. T. Turrell.

# New Fall Styles Suits, Coats, Dresses, Skirts and Shirt Waists

An interesting assortment to show you. The exhibition is more than pleasing. It is more than attractive because it gives the first hint of the new styles and colorings and in the face of the unusually high cost of materials, you will find prices particularly attractive.

## Women's Fashionable Fall Suits

Here are suits that express the fashion's idea in every detail—garments that represent the last word in fashion demands. The coats are long, mostly with large collar, the skirt has shirring that helps make the suit particularly attractive.

WOOL POPLIN SUITS, \$19.75, an unusually good value.

OTHER SUITS \$22.45, \$24.75, \$32.45.

## Advance Fall Coats

In unusual values for motoring and general wear. Have you given thought to the wisdom of early choosing of a coat? A very good reason for buying early may be gained from the experience we had during the last few weeks. Since we purchased this splendid assortment the manufacturer has advanced the price from \$2.50 to \$5.00 on a garment. We feel that we are saving you this amount on these stunning coats.

WOOLTEX COATS, \$19.75, \$22.45, \$24.75, \$27.45, \$34.75, \$37.45.

OTHER COATS, \$14.45, 16.45, \$19.75, \$22.45, \$24.75.

## Dress Skirts of Quality

Choosing a separate skirt at this store brings to you the assurance that it is in the correct style. We have a large number of new smart styles just arrived from the best makers.

SKIRTS for \$3.95, \$5.95, \$6.75, grey and brown mixtures in a number of attractive styles.

DRESS SKIRTS \$4.95, \$5.95, \$6.75, of Poplin and Serges in a good variety of styles.

Make this store your headquarters during the Fair, leave your bundles, meet your friends, use our telephones.

# BROWN, BUCK & CO.

Norway, Maine

Mr. and Mrs. Charles H. Batchelder of Portland, Mr. Edridge Gann and daughter, Mr. Edgar Dunn of Norway, Dr. Harry Nutter of Worcester, Mass., were recent guests of Mr. and Mrs. Arthur Douglass.

Miss Adelaine Hensell was the guest of relatives at Bryant's Pond, Friday.

Mrs. Arthur Douglass spent several days at her home in Norway last week.

Mr. T. H. Huldeger has moved his family to Portland.

Mr. Harold Rollins and son, Harvard, were in Norway, Sunday.

Mr. D. T. Harell is visiting relatives at Norway and Auburn.

Miss Azelina Hamlin of Milan, N. H., was the week end guest of Mrs. Leanne Howe.

It is easy enough to get sick, also it is easy to keep well. If you eat rich food frequently, if you neglect to chew your food properly, if you eat too much, especially when all tired out, you are taking a pretty sure course towards sickness, biliousness, headaches, colds, deranged stomach or sickness in some other form.

Getting Sick  
AND STAYING WELL

You can keep well by not doing these things, and you will be much less likely to take cold, by keeping your digestive organs in good order. If you have been indiscreet, and are suffering from biliousness, loss of appetite, sour stomach or constipation, don't hesitate to use the true "L. P." Atwood's Medicine. It is safe and reliable and will help you to get well and stay well. 30 cents a bottle. Sample free. "L. P." MEDICINE CO., Portland, Maine.

POEMS WORTH  
READING

## DON'T GIVE UP TRYING.

Gertrude Phelps Deane.  
Don't give up trying,  
Whatever you do;  
Nothing on earth  
Makes one feel quite so blue.  
What is the reason?  
You may not succeed!  
Courage, my brother,  
Is all that you need.

Don't give up trying  
And hang down your head;  
Look up and smile  
And be hopeful, instead.  
If you'd win glory  
Or if you'd win pelf,  
This is the secret:  
Believe in yourself.

\*\* \* \* \*  
THE FLAG OF OUR SKIES.  
By the Rev. Francis P. Donnelly  
After General's "March Procession  
A.D. Dedicated to the Holy Cross  
Tracing Corps.  
Red with the brightness  
That dimes the sky with coming  
morn;  
White with the whiteness  
That dyes the day when fully born;  
Blue with the azure  
Of heaven and its starry host;  
Hail to our treasure!  
Our flag, our love, our proudest boast!

Then let it float with the glories of  
the skies,  
And roll on high its white and its red  
walled bars;  
Fling out its folds for the storm king  
it doth;  
And let it dash through the gloom all  
the lightning of its silver stars.  
Aye, let it float with its hues from  
the skies above it;  
With the red of the dawn, the white  
of the day, the blue of the night,  
we love it.

CHORUS  
Nay, it, proudly wave it;  
With your life's blood gladly save it;  
Praise God who gave it;  
The flag of the good and true.  
Bend it now bravely stand,  
Guard it ever with a strong right hand;  
Leave the banner of your native land,  
The Red, White and Blue.

A REGIMENT PASSES.

By Margaret E. Bangs, Jr., in the  
Christian Herald.

Eager, though half afraid, we stood  
Along the street,  
And, coming near, we heard the tramp  
of many marching feet;  
We heard the thrilling beat of drums,  
The ringing sound of cabs;  
And some of us looked up and smiled,  
And leaped away the tears!

Surprised and miserable, we watched  
them as they came,  
And some of us were white and  
crushed, and some were all adine  
With pride for these our soldier boys;  
— and some were cold with dread;  
Our women stood with lifted chin, and  
eyes with drooping head.

Mother and new-made wife, together  
whispered,

One of them touched me with her hand,  
and "There goes Jim!" she cried.

From both of us there came a voice  
that, shaking, tried to say:

"Quick, darling, look at daddy—quick—  
Before he goes away!"

Surprised and giddy and, we  
watched the column go;

Some souls were touched with awe;

Then, hope, some heartache full  
brought down;

And "An' now," one of us laughed;

and "Dear, good by!" one added;

And all stood at like a wall, the  
thrilling drumbeats throbbed.

Brave and dim of eye, we stood along  
the street;

And watched them as they whirled  
from sight. The sound of march  
the feet

was like a roar from afar, an echo  
dashed in stone;

And some of us stood up and saluted;

— but through a veil of tears

as we

CHORUS

Be Merry, everyone!  
Look about, as the world, it's all the  
same today;

Be more, more, more, more, and more,

Be less, less, less, less, and less;

Be the right to suffer, see Old Oliver

over.

You have had my love, sister of the  
land;

From you, home, or here, where a  
singing land

With love, goodness, fair, radiant as  
sunlight;

Look up to light, fighting you and  
you.

WILLIAM  
TELL  
FLOUR

"It's easy to make good bread  
With WILLIAM TELL FLOUR.  
It's so easy, it's just fun".

## ALL TO THE POINT.

By Arthur G. Burgoine.  
Now Jack and Tom and Jane and Kate,  
Come hurry up and don't be late.  
Brush off the dust from book and  
plate.

And think no more of play.

(How fast these days of pleasure  
fly!)

Henceforth you're either fish to fly,  
Or school is on today.

Once more the Itzzen threated bell  
Rings out. "Ding dong!" which  
means farewell.

To Itzzen. Those sounds fortell

A busy time for all!

Once more the tiny sleepy head  
You soon must tumble out of bed  
And rally forth with hurried tread

Regressive to the call.

At school the eager infant host

Will find the teacher at her post

In half-forgotten tasks engrossed.

"Be hard for her, poor snail

To start again the same old grind.

And, having summer joys behind,

On labor day to fix her mind

And keep it 'keen' control.

Instead of thinking of her free

And easy times beside the sea,

Or on the farm, for her 'will be

The three scholastic 'K's.

It is her duty to forget

The numerous kindless girls she

met;

None of 'em won't. On this we'll be

The solar or stars.

But time will smooth the rough spots

we're

And things will all be as before.

No increased affliction are

Teach'd, nor, as you may vain

And then the actual tail's off will

come.

To start and all will end in peace

Until there comes a new release

And school is out again.

— MIDDLE INTERVAL ROAD.

Mr. and Mrs. F. C. Wright and their  
children have been living in Bethel  
since 1908, and are now settled  
in the town.

Mr. and Mrs. J. P. Conroy visited  
the town on Friday last.

And father and his sons and grandsons  
are here for the week, Tuesday evening

— but through a veil of travel

as we

BORDEAUX MIXTURE EF-  
FECTIVE IN CONTROLLING  
LATE BLIGHT OF POTATOES.

A Discussion of the Factors which In-  
fluence the Results Obtained from  
Spraying Potatoes.

Bordeaux Mixture Used?

The Station recommends freshly

prepared Bordeaux Mixture and does

not recommend any "just as good"

substitutes. The Station has never

tried any commercial or home prepared

material which, when used in economi-

cal amounts, equalled Bordeaux Mix-

ture efficiency in controlling late

blight. This statement is in no way

applied to the efficiency of proprietary

sprays in killing "tugs" or the lar-

vae of the Colorado potato beetle.

There are numerous, relatively cheap

and efficient prepared insecticides on

the market. It is quite another mat-

ter to produce a concentrated spray

material which can compete with prop-

erty and freshly prepared Bordeaux

Mixture either in efficiency or in cost.

The fungous destroying qualities of

Bordeaux Mixture depend upon the

copper compounds formed from the

chemical reaction which takes place

when a dilute solution of copper sul-

phate is mixed with a diluted milk of

lime. In the last analysis the fun-

gousidal value of a mixture depends up-

on the amount of metallic copper pre-

sent, and the form of combination.

Five pounds of copper sulphate will

supply a little over one and one-fourth

pounds of metallic copper.

From the claimed analysis of the commercial

material the purchaser can figure how

many pounds of the substitute he must

use in 60 gallons of spray to obtain

the same amount of fungicidal copper.

Incidentally he might figure the rela-

tive costs of the substitute and home

prepared Bordeaux Mixture when both

are made up so they will carry equal

amounts of the real fungicidal agent,

metallic copper. Aside from the amount

of copper, freshly prepared Bordeaux

Mixture made from dilute solutions

possesses superior qualities in many re-

spects. Bordeaux pastes and powders

are not freshly prepared and are not

made from dilute solutions.

Miss D. Wolfe, Director.

one made after. The former prevents  
infection and the latter may or may  
not. If there is time for the spray to  
dry before the rain comes it sticks  
better and does more good than is  
popularly supposed. Bordeaux Mixture  
is a preventive not a cure of blight  
and rot. Late blight starts first on  
the lower leaves. Early, thorough  
spraying gives these leaves a protective  
coating. The rapidly growing  
plant soon covers them, prevents  
washing by rain and thus these potential  
centers of infection retain  
their protective coating throughout the  
season. If spraying is not begun till  
the plant has begun to develop numerous  
one side branches it is next to impossible  
to reach these lower leaves with  
any ordinary spraying apparatus. If  
blight has already started, the problem  
of control becomes all the more  
difficult.

Was the Spraying Thoroughly Done?

The Station directions call for high  
pressure and sufficient nozzles are  
arranged so as to completely cover the  
plants with a fine mist like spray.  
Were there enough nozzles to the row,  
and were they so arranged that they  
covered the entire row with spray at  
each application? Were the nozzles of a type and did the pump supply  
sufficient pressure so that the spray  
was delivered in a fine mist that penetraed  
forcefully into the interior of  
the mass of foliage on each plant? In  
other words did a majority of the leaves  
on each plant get a thorough  
coating, and all of the leaves receive  
at least some of the spray? The grower  
should answer this question to himself  
by observation when he sprays.

In a season like the present complete  
protection from late blight can only  
be expected when these conditions are  
fulfilled. On the other hand, it is often  
surprising how much good is sometimes  
accomplished by relatively inef-  
ficient spraying.

One nozzle to the row is sufficient  
only when the plants are small. Tho-  
roughness in spraying should not be  
measured in gallons per acre alone.  
Fifty gallons per acre means only  
about two teaspoons per plant per applica-  
tion—far too little when the plants  
are large, if the work is to be  
effective.

Was Freshly

## A Man in Demand

The Bay State leaves a broad, bright streak behind. Here, he makes a house or barn sparkling new; there, a boat, barge or what-not is put in the pink of condition. Then he's off to his next job, in double-quick time.

When you buy paint see that the label says "Bay State" in big, bold letters. Don't let the dealer quibble; remember—"Bay State."

We've a book about this "man in demand" and his paints. Send for it—it's free.

### NATIONAL CAPITAL.

Continued from page 1.

assisted a lot of presidents, and when the "insurgents" broke loose he was the most fiery of them all. Four years ago he was the leader of the small group of Progressives who came to Congress on the Roosevelt, break from the Republican party. Afterwards he ran for Senator in Kansas and was defeated. Then he went to the last Progressive National Convention, but refused to follow Roosevelt back into the Republican party. Just before election it was announced that he would support Wilson. Now he returns to Washington as a member of the Federal Trade Commission, a place for which he seems eminently qualified. The Commission has some of the biggest war problems to handle, and it has grown late one of the most effective branches of the federal machine. Washington is pleased to have the "Very Merleek" back again.

### AMERICAN MEAT-RAKERS.

The American people have been eating up their livestock without replacing the supply for twenty-five years. Consequently beefsteaks have become almost a delicacy and pork chops as extravagances. Now a hundred and twenty-five livestock specialists from all parts of the country have gathered in Washington to determine "what we are going to do about it." The war complicates matters, as this country is expected to send meat abroad, while it has an insufficient supply for the wants of our own people. Official statistics show that the meat supply according to the population, stands about half what it was quarter century ago. Several million dollars worth of literature has been issued by the Government trying to induce the raising of cattle. But the propaganda has not been successful, and the 125 experts will do well if they suggest some other scheme besides coaxing farmers. Because the farmers won't be coaxed.

### THE BUFFALO JAIL GROUP.

Nearly twenty women have been sentenced to jail for picketing the White House during the past month. It has developed as a meeting held in headquarters at Washington that the women are receiving large financial support. One of the women who has been in jail related of a gathering of her associates that the next "trip" into Washington, New England, and hill meetings. She said the people came to her last, largely out of curiosity. And when she had disclosed her story she was sentenced to continue the work which now consists principally of picketing the White House. Evidently it is the purpose to send the women who have served jail sentences to all parts of the country to tell of their experiences and advocate women suffrage.

### SEVEN TONS OF POLLUTION.

There is a daily average of seven tons of trash and dirt sent by the two houses of Congress from Washington. Nearly all of it is cage page material.

### WEST PERU.

Allen Smith and family also plan to speak at the meeting at the Hotel Peru at 7:30 p.m. Sept. 14.

Miss Flannery and family of Hallowell were guests at H. H. Tracy's over Sunday.

C. H. Durfee and family will return to the village on to be near their work.

Mr. H. C. Durfee came home from eastern last week, where he has been on a visit with Mr. Leo H. Adams.

Midland Trust and Mutual National were visitors on Sunday at Hallowell and Miss Adams last Sunday.

Mr. H. C. Durfee and son, Mr. Leo, were visitors in this place a few days last week.

C. H. Durfee and wife were at New York Saturday to take advantage of the dollar day bazaar.

Perhaps the military man might be out of the country if he had the time.

### TOMATO WILT.

No Known Cure—Medicine Plants Offer Most Satisfactory Method of Coping with the Disease.

While there is no cure of plants once affected with tomato wilt, steps may be taken to avoid or prevent the disease, says the United States Department of Agriculture. The most hopeful method is by selecting the seed from resistant plants.

This disease of the tomato, known as "fusarium wilt," occurs in practically all of the eastern half of the country and is common in the sandy soils of the Southeast. It has a particularly discouraging feature in that the plants may be large and beginning to set fruit before the disease shows and they begin to wilt. Usually the lower leaves show the disease first. They turn yellow and wither, and then the whole plant wilts as if for lack of water, sometimes without the characteristic yellowing of the lower leaves.

#### Cause of the Disease.

The disease is caused by a minute fungus which lives on decaying vegetable matter in the soil. It attacks the new roots first and goes upward through the water-carrying channels in the stem, filling them up and cutting off the moisture supply. As soon as the plant shows the effects of the disease it should be removed and burned to prevent the formation of the spores by which the fungus is reproduced.

Since the plants once affected are lost, control measures must be aimed toward prevention. The seed bed must be in uninfected soil, since a common method of spreading the disease is to set out plants from infected beds, soil sterilization by live steam will kill the fungus. Rotation with other crops may save an infected field, because the tomato wilt organism does not affect other plants and will die out if tomatoes are kept off the ground. In a garden the location of the tomato plants should be changed each year, and if the entire garden is infected tomatoes will have to be left out or planted elsewhere for a time.

New soil may be infected by the transfer of the fungus on particles of soil clinging to implements, to the feet of workers or work animals, to old tomato stakes, or in drainage water from an infected field higher up.

There is a possibility that infection may be carried on the seed, so it should be saved from healthy plants.

Therefore a pound of peanuts has a greater seed value than corn or maize.

Fifty years ago a gentleman named Thomas B. Rowland, now ninety-two years old, with whom I talked in Norfolk, introduced the Virginia peanut into the peanut society. He made the first shipment of the Virginia nut to New York, and after awhile the yell of "hot roasted peanuts" attracted the attention of Manhattanites, and they have been eating peanuts in increasing quantities ever since. Mr. Rowland says it was hard to get people started eating peanuts; but that he succeeded in his initial efforts is evidenced by the fact that his would be more or less of a tragedy in these modern times without peanuts.

Future trials on infected land will determine whether an immune variety has been found.

#### Resistant Plants.

The most satisfactory method of control will be through the planting of strains or varieties resistant to the disease. Progress is being made by the Department of Agriculture in the breeding of such varieties, and it is expected that seed of these will be ready for distribution within two years. Farmers may take resistant seed selected from their own fields or from others.

The seed of the resistant varieties is saved from healthy plants growing in a fairly diseased field. Future trials on infected land will determine whether an immune variety has been found.

There is a daily average of seven tons of trash and dirt sent by the two houses of Congress from Washington. Nearly all of it is cage page material.

### "THE HUMBLE PEANUT."

By J. E. Jones.

Norfolk, Virginia, Aug. 25. I am told that they are making triglycerides out of peanut oil, and in that case I suppose the results will be a case of shooting peanuts into Kaiser Bill's crowd of democracy-busters.

The Virginia peanut will be harvested in a few weeks, and the extent of the industry is shown by the fact that its value will amount to over \$20,000,000. By this time Mr. Peanut gets to the consuming public in bags, confectionery, oil, salted peanuts, and its other products, the Virginia-Carolina product will likely equal in round dollars almost as much as the size of the first Liberty Loan. This may sound rather an extravagant estimate, but there are between 800,000 and 900,000 acres of soil in the district doing their bit in the growing of peanuts; and the humble peanut becomes very much of an aristocrat on the market by the time he evolves into the products of the best candy makers, or has the oil squeezed out of his valuable carcase, and is offered to the public as "pure olive oil."

The peanut has "gone some" since those days right after the Civil War when it first broke into commerce. The Virginia crop in those days amounted to only 200,000 bushels, and much of it was used as live-stock feed. The Smithfield ham became famous because the razorback hogs from the Virginia village were fed and sweetened on peanuts. And today there are no ham in the world equal to those cured at Smithfield.

During the past two weeks I have been enjoying the salubrious climate, and looking into the beauties, glories and achievements of the Old Dominion.

Among the peanuts of Virginia

I have found respite from the din of war talk, and I concluded that it was a good story, in view of the fact that everybody eats peanuts; though they are grown only in certain areas.

My first discovery was that it is a misnomer to speak of the peanut as "humble," since in southeast Virginia and North Carolina I found Al towns, with great peanut factories—clean, spacious and inviting, devoted to the industry. The factories are the industries that constitute the big profitable activities that have resulted in the building of fine towns and cities. The National Peanut Cleaners and Shellers Association is composed of as fine a group of business men as can be found in any manufacturing or industrial pursuit in the country.

Their headquarters are at Norfolk, which is the principal point for handling the nuts in the factories. Norfolk retains the lead in sales.

Since the plants once affected are lost, control measures must be aimed toward prevention. The seed bed must be in uninfected soil, since a common method of spreading the disease is to set out plants from infected beds, soil sterilization by live steam will kill the fungus. Rotation with other crops may save an infected field, because the tomato wilt organism does not affect other plants and will die out if tomatoes are kept off the ground. In a garden the location of the tomato plants should be changed each year, and if the entire garden is infected tomatoes will have to be left out or planted elsewhere for a time.

When I asked Secretary Cox of the Chamber of Commerce at Norfolk to give me a poster on the most interesting topic that he could think of, he rattled off a list of things, including the big naval base, truck gardening, etc. To the list he mentioned "peanuts," and that sounded like poetry to me. Most of the ordinary things can be done in the average community, but peanuts is unique. And so it came about that I learned my lesson in peanuts.

BRYANT'S POND.

The vote was very light here Monday, about a third of the voters registered, coming to the polls. On the suffrage amendment the vote was 47 in favor to 46 against. J. M. Day and Fred P. DeGion served as ballot clerks.

Woodstock's Red Cross Auxiliary sent its first box for the soldiers to Peter Pan Hospital last week. Much of the work has been done through meetings at Mrs. Ellery's tea room.

Deafies, soots, scarfs, sweaters and wristers, there were forwarded 14 comfort pillows, 4 bed pads, 23 yards of square bandage, 12 operating towels, 12 serpillies, 20 feminine cloths, and 400 eye dressings.

The comfort shop was opened for business Tuesday morning. Not much of the work has matured yet, and probably there will be various shut downs before the crop is all ready.

James H. King, carrier on Route 1,

is taking a vacation and will be visiting in Portland and Boston.

WEST BETHEL.

The first frost at this place came Monday, Sept. 18.

School is in the West Bethel district

resumed work Monday with the same teacher, Miss Jessie Bean, also the first school began the same day with Miss Eva Bartlett as teacher from E. Bethel.

E. M. Morse is being visited by his son, C. A. Morse, and daughter from Melford, N. H.

Mr. Helen Tyler came home from Norway, Monday.

There were six to go from this place Tuesday to Bethel village who will attend Gould's Academy, four of whom had been here all year.

### "COMMON STORAGE OF APPLES."

### ATTENTION DRUGUSERS

Faulty Construction and Mismanagement of Houses, Chief Cause of Losses by This Method, Say Specialists.

Apples keep for a reasonable time in good condition in common storage, provided the storage is carried on under favorable climatic conditions and skill and diligence are exercised in the construction and management of the storage house. A good house properly managed will prove disappointing, while a poor house well managed may prove quite satisfactory. The man in charge is the most important factor for success or failure. The unsatisfactory results often experienced in this type of storage in the apple-growing sections of the Pacific Northwest are not due to the principle of air cooling or common storage, according to specialists of the United States Department of Agriculture who have just published a report of investigations on this subject. This publication, "Farmers' Bulletin 852, 'Management of Common Storage Houses for Apples in the Pacific Northwest,'" by H. J. Ramsey and S. J. Dennis, discusses the reasons for losses in common storage in the Northwest, describes the fundamental requirements of a good storage house, and points out how the houses already built can be utilized to the best advantage.

Where climatic conditions are favorable, apples can be held in common storage for long periods in almost as good condition as in cold storage, the specialists declare. When long storage periods are necessary cold storage has advantages over the common storage method. When common storage is employed to supplement cold storage facilities, it should be the aim to move that part of the crop held in common storage earlier in the season. That apples have been held in good condition for several months in air-cooled storage houses in the Pacific Northwest shows that this method is entirely practicable in that region, say the specialists.

Whether or not apples will keep well in storage depends upon several factors—the inherent keeping quality of the variety, soil conditions and the cultivation of the trees, care in harvesting, the maturity of the fruit at harvesting, the time of picking, promptness in cooling the apples, and the temperature and humidity conditions of the storage houses. A common storage house must provide for free intake and circulation of cold air during the night or cooler portions of the day. This cold air must be conserved by the prompt closing of outlets and intakes as soon as the outside temperature begins to rise and also by suitable insulation to prevent the leakage of heat through the walls, doors, and ceilings.

Salespeople Improve your selling ability and earn more salary. "THE WORLD'S BEST SALESMANSHIP SUGGESTION" tells you how to do it. What every clerk and saleswoman should know—Price 25 cents.

of the building.

Storage houses must not be used for packing during the harvesting season. Even when utilized only for storing it is often very difficult to effect the necessary cooling. The maintenance of satisfactory storage conditions in a house used for other purposes is out of the question. The storage room should be opened only for putting in or removing fruit or for ascertaining temperature conditions inside.

Memorial Day I helped fire the gateline—twenty-one shots from a three-inch gun, ten seconds apart; quite a noise.

The place is overstocked, and we don't get as much good stuff as we ought. I shall be glad when I go to my regular Post.

Mr. Mundt writes to his mother, from Camp Wilson, Texas.

My Dear Mother,

I left Fort Slocum a week ago today. We had a fine trip. It took us from Monday, 9:30 a. m., till Thursday, 1:30 p. m., to get here. I like it much better than at Slocum, although it is awfully hot; the thermometer broke at 122° Saturday. They work us hard, but I like it. It wasn't that one is apt to be sent away to have his head taken off, he would love the life.

If you see any blots, don't think they are tears. I'm sweating like a mackerel. Today was my first exercise on the horses. I expect to know how to ride when I get out of here. We also have drills on marching in columns and also in squads of four; also drills on the guns; not firing them, but in aiming the parts and extracting the charges. We work from 7:00 a. m. to 4:30 p. m. with the exception of some time off in the afternoon.

A soldier can't go anywhere in civilian clothes, and no liquor is sold him. All the nuisances in the city of San Antonio have been closed. We get better food here than at Slocum. We also have better tents, with a floor and part board walls. We have to keep ourselves clean, our tents and our streets, as we call them. No one knows how many are here. We have 100 in our battery, and there are but ten from A to E, besides a supply company. Of course there is only one regiment of field artillery, but there are three of cavalry, and as many of infantry, medical corps, and signal corps.

I am carried away with the army life. I'm glad I joined.

A week later Mr. Mundt writes:

I have been here a week, and find it a fine place. I like it better and better every day, but I see one will soon get lazy as imaginable here. We have to keep on the go, but not work. I think it would kill me to do real work now. We have quite a few horses, and take care of the horses every day.

The horses are not exactly saddle horses, but know where to get better than many of us men. The other day one of the non-commissioned officers got mad at a number, and told him to get off the reins; and that the horse would go across if he just gave the command. The horse did get mad, started half, came right and left perfectly. Today I had a big, balking horse. Every time he came to a ditch he would walk through, but when he got on the other side he would back
